EXPERIENCE

SnapSuite Inc

User Experience Designer, Summer 2018

At SnapSuite, I worked on digital products such as white papers and marketing videos. I designed and coded two websites, one for onboarding clients and payments, and a customer portal. For design I used Figma, Illustrator and After Effects. I programmed in VueJS, HTML, & CSS.

SAP Waterloo

UI/UX Designer, Summer 2017

At SAP I designed the User Experience, User Interface and built the website for the Toronto International Film Festival's Film Recommendation Tool. I also designed and built a showcase website for SAP Predictive Analytics. I created mockups using Sketch and built the websites using HTML, CSS & JavaScript.

SAP Labs Palo Alto

Videographer, Summer 2016

At SAP Palo Alto I was tasked with developing experiences through video. The team wanted students to understand and experience what other students had gone through during and after completing their course (Organizational Psychology of Design Thinking: Empowering Design Minded Intrapreneurs) course. I coordinated, interviewed, recorded, edited and created videos of nineteen prior students and four lecturers.
